Kevin Daniel Pelozo Retamar

Software Engineer · Applied AI

Software engineer with 7+ years shipping production software end to end: WordPress and PHP, Ruby on Rails, React and Next.js, APIs and AWS infrastructure. Today I bring AI into real products: LLMs inside Finwaise, an AI-native ERP, agentic development with Claude Code and MCP, document pipelines, E2E testing and generative AI for marketing. Background in finance and process analysis.

EXPERIENCE

Software Developer & AI Solutions Engineer

Apr 2019 - Present

deLaGuayaba S.A. · Costa Rica

Finwaise · AI-native ERP (team product)

- Contribute across the product, mainly the **Finy agent** (LLM extraction, classification and bank reconciliation), the **verification engine** (60+ tax and accounting checks) and **ERP modules** (payables, sales, treasury, accounting, reporting).
- Designed the **document pipeline**: AWS Textract OCR, LLM structuring and validation, orchestrated as production workflows.
- **E2E testing** with Playwright and Chrome DevTools; **agentic development** with Claude Code and MCP servers.
- **Generative AI campaigns** for the new marketing team: images, voice (ElevenLabs) and video (Remotion).

Client platforms

- **küikmatch** (2020 - now): led a WordPress multisite platform for entrepreneurs with 3,000+ users and 600+ companies: LMS, BuddyBoss communities, memberships, geo directories, ticketing.
- **wasa.app** (2022 - 2024): WhatsApp Cloud API e-commerce chatbot on Ruby on Jets and AWS Lambda, React admin, AI-assisted scraping. **Division50**: WhatsApp campaign chatbot.
- **Doorvel** (2021 - 2022, Mexico): real-estate and e-commerce MVP with subscriptions and payments; migrated 6,000+ properties and 200,000+ media files; trained new developers.
- **Control Car BAC** (2019): process mapping, database review and merge, Intercom rollout, map of 400+ service stations.
- Corporate sites on WordPress and AWS: Cámara de Bancos CR, ABC Dust, Voces Vitales, Grupo TLA, Neutral Logistix, ALPROSA.

Engineering and team

- **50+ production environments** at 99.9% uptime, with zero-downtime migrations.
- Piloted AI tools with the team and scaled what worked. Documentation and training: **+40%** team efficiency. Technical support for sales: **+63%** site visits.

OWN PROJECTS

- **Iglesia Central AD** (2026): bilingual site plus a team panel for service planning, worship sets, rotas and availability, with push reminders, PDF and Excel export. Next.js, TypeScript, Postgres, Auth.js.
- **Clear Books**: budget and salary tracker. React, Vite, Tailwind, Recharts, Firebase.

EDUCATION

Systems Engineering

Universidad Americana (UAM), 2011 - 2015

CERTIFICATIONS

GitHub for developers, LinkedIn Learning, 2021

Meta Ads (Facebook, Instagram, WhatsApp), 2021

JavaScript, Udemy, 2024

LANGUAGES

Spanish native

English B2, professional

CITIZENSHIP

Polish and **Argentinian**

SKILLS

AI

Claude (API, Claude Code), OpenAI, Gemini, MCP, agents and tool use, prompt engineering, OCR and document pipelines, workflow orchestration

Generative

image models, ElevenLabs, Remotion, Pexels

Backend

Ruby on Rails, Ruby on Jets, PHP, REST APIs, PostgreSQL, MySQL, SQL Server

Integrations

WhatsApp Cloud API, Meta, Stripe, Google Maps and many more

Frontend

React, Next.js, TypeScript, JavaScript, Tailwind, WordPress (multisite, custom themes)

Cloud

AWS (EC2, S3, Lambda, Amplify, Route 53, Textract), DigitalOcean, Docker, Apache, Ubuntu, CI/CD, Git

Quality

Playwright, Chrome DevTools, staging and production environments

Ways of working

Agile, Scrum, Kanban, Jira, Confluence, Bitbucket

Design

Figma, Illustrator, After Effects

Business

accounting, finance, process mapping, Tableau
